Solution We are to define the Mach number of a flow and the
meaning for a Mach number of 2. Analysis The Mach number
of a flow is defined as the ratio of the speed of flow to the
speed of sound in the flowing fluid. A Mach number of 2
indicate a flow speed that is twice the speed of sound in that
fluid.

Fluid mechanics is the branch of classical physics and mathematics concerned with the response of matter that continuously deforms (flows) when subjected to a shear stress. The subject can be divided into fluid statics - the study of fluids at rest, and fluid dynamics - the study of the effect of forces on fluid motion. Fluid flows impact transport and mixing (of materials or
