Give each student a pencil and a blank piece of paper. Give each student two sets of manipulatives to add together. Don't give anymore than 5 in each set. Ask students to count the number of manipulatives in each set, and record the amounts on a piece of paper. Ask students to add the two numbers together.

Simple Addition | Lesson plan | Education.com

One student will write one number (1-9) and the other student will write another number (1-9) on the board. Development: The teacher will place an addition and equals sign on the board and then introduce the lesson topic. The teacher will then briefly re-teach how numbers represent quantities. The tens blocks will then be used to represent the numbers in the equations.
