Traumatic Stress: The Effects of Overwhelming Experience ...

These are some common effects of trauma that you might recognise: Flashbacks - reliving aspects of a traumatic event or feeling as if it is happening now, which can happen whether or not you remember specific details of it. To find out more, see our information on flashbacks. Panic attacks - a type of fear response.

tell you about the impact of post-traumatic stress on your body. A stressed mind will always have significant effects at a physical health level. Post-traumatic stress is a mental disorder that results from exposure to traumatic events. Exposure to an accident, a war, homicide, a natural disaster, physical or emotional abuse are all things that may trigger it.

Feeling upset or distressed by what happened when you were giving birth might mean you had what's known as a traumatic birth. Many mums' traumatic births are linked to medical staff using forceps or a ventouse, induction or poor pain relief. Women can have traumatic births because of very lengthy or short but very painful labours, or an unplanned caesarean (Birth Trauma Association, 2009 ...

And studies show that caregivers who are regularly exposed to traumatized patients often develop symptoms that mimic post-traumatic stress disorder. One study, published in 2007, found that more than 15 percent of social workers met the criteria for PTSD, which includes difficulty concentrating, avoiding people, and having disturbing dreams.
